GENERAL OBJECTIVE OF THE JATC

Support the implementation of the Tobacco Products Directive throughout the 28 EU MS

The TPD aims to preserve a high level of European public health and support the functioning of the internal market of tobacco products in the EU.

Provide regulation of tobacco products, novel tobacco products, electronic cigarette products

The JATC is a collaborative action between the European Commission and the EU Member States built on evidence-based tobacco control policies with the overarching aim to be implemented at a national, regional and European level in order to improve Public Health protection in the EU.

ENSP and conference official journal

Welcome

**Dr. Francisco
Rodriguez Lozano**
President of the ENSP

The 4th International Conference of the European Network for Smoking and Tobacco Prevention will be organised in partnership with the Romanian Society of Pneumology (SRP) and hosted in the centre of Bucharest.

The European Network for Smoking and Tobacco Prevention (ENSP) has been active in tobacco control since 1997 and for the last 20 years has been playing an important role in setting and influencing policies at a European and international level. Spearheading ENSP activities and projects are national representatives, organisations, academics, doctors, lawyers, health care professionals, experts and activists who always worked together to fulfil the objectives and mission of ENSP.

ENSP is the only truly pan-European network active in tobacco control being the key grassroots organisation in implementing the World Health Organization Framework Convention on Tobacco Control (WHO-FCTC) at a European level. This was acknowledged by the WHO-FCTC – Conference of Parties during the session in Uruguay (November 2010) when ENSP received FCTC observer status.

It is almost impossible to talk about FCTC in Europe without mentioning the involvement of at least one ENSP member. This united and collective effort is the essence, the heart and soul of the “Network” concept: each link makes the chain stronger; each node adds value to the structure. This added value is not only found in the strength of the partnership but also on a scientific level in everything ENSP does: its core activities, its EU projects but also its scientific journal, “Tobacco Prevention & Cessation”.

Tobacco consumption remains the single largest avoidable cause of premature death in Europe, responsible for 700,000 deaths every year, and is the most significant cause of health inequalities. It is an interesting time for our work in tobacco control, as the world recognizes that the most effective policies are those based on scientific studies and solid evidence.

During the conference, as you discover and meet special guests and speakers from the International and European academic Institutions, national authorities and well known non-governmental organisations involved in tobacco control at the regional, national and international level, we hope you have the chance to share your experiences and insights pertaining to various facets of tobacco control.

On behalf of the ENSP members and Secretariat, we are honored to invite you to our Tobacco Control Conference in Bucharest and would like to thank you for your work and your dedication to tobacco control.

Assoc. Prof. Ruxandra Ulmeanu
President of Romanian Society
of Pneumology

Prof. Florin Mihălțan
Co-Chair of the ENSP Scientific
Committee

Dear participants it's our pleasure to welcome you to the 4th ENSP-SRP International conference on Tobacco Control in Bucharest. During these days, we have again the opportunity to share impressions about the situation of tobacco control from different perspectives and in different countries. As tobacco use is still the main evitable cause of mortality, scientific societies, professional associations, NGO, civil forces and government representatives need to gather forces in order to reduce tobacco epidemic. It is also a unique moment to discuss the new strategies of tobacco industry and the "healthy" tricking new products of the transnational tobacco companies. After these 3 intense days of conference, we are sure that we will go back home with a long list of pending tasks in our mind, in order to persevere in our main objective: to reduce the burden of tobacco in our society. Many progresses have been made, but some new barriers in the last year have to be considered and overcome. Experts from all over the world will give us some clues about how to face the new challenges. On behalf of the SRP, we would like to thank all the people that have made this meeting possible, and of course thank you all for your participation as a key of success. Welcome in Bucharest, a capital which also has many touristic offers for all the participants of this conference.

Prof. Panagiotis Behrakis
Co-Chair of the ENSP Scientific
Committee

It is a pleasure to welcome you this year to Bucharest, the capital city of Romania and also the heart of media, culture, and art.

The 4th Annual Conference of the European Network for Smoking and Tobacco Prevention (ENSP) in partnership with the Romanian Society of Pneumology (SRP), joining local and global efforts towards the tobacco endgame in Europe, will take place on March 27, 2019 in the heart of Bucharest.

The main objective of the conference is to advance the role of science in various aspects of tobacco control and to improve the scientific content of strategies on smoking cessation, prevention and regulation of tobacco products in the European community. Distinguished scientists specializing in tobacco control from all over the world will share their expertise and scientific research regarding the global tobacco epidemic aiming to achieve effective implementation of the WHO Framework Convention on Tobacco Control (FCTC) and EU Tobacco Products Directive (TPD).

The goal remains definite... "Tobacco-Free Europe"!

Committees

ENSP Board Members

Tobacco dependence treatment training

e-Learn at **www.elearning-ensp.eu**

European Network for Smoking Prevention's (ENSP) Accredited e-learning program for Tobacco dependence treatment.

This online, accredited by the official European Accreditation Council for Continuing Medical Education (EACCME), training program provides the opportunity for health care professionals in Europe to receive training in the latest evidence-based practices for helping their patients quit smoking.

The e-learning courses are available in these languages:

Download the Guidelines for Treating Tobacco Dependence
and take the courses at the E-learning website:
www.elearning-ensp.eu

Tackling secondhand tobacco smoke and e-cigarette emissions: exposure assessment, novel interventions, impact on lung diseases and economic burden in diverse European populations.

TackSHS is a new research project funded by the European Union's Horizon 2020 Research and Innovation Programme. TackSHS aims to improve our understanding of second-hand tobacco smoke and e-cigarette emissions and find ways of tackling the health burden caused by exposure to these aerosols.

TID 15TH ANNUAL CONFERENCE

INTERNATIONAL SOCIETY FOR THE PREVENTION OF TOBACCO INDUCED DISEASES

13-15 October 2019

Tokyo, Japan

National Cancer Center

Research Institute

The Call for Abstracts and Symposia Proposals will start on the 1st of April 2019 and will last until the 30th of June 2019. For more information visit our website www.isptid.org

**IMPACT
FACTOR 1.54**
www.tobaccoinduceddiseases.org

An Open
Access
Scientific
Journal

Tobacco Induced Diseases (TID) encompasses all aspects of research related to the prevention and control of tobacco use at a global level. Preventing diseases attributable to tobacco is only one aspect of the journal, whose overall scope is to provide a forum for the publication of research articles that can contribute to reducing the burden of tobacco induced diseases globally.

The journal encourages the submission of articles from all medical, biological and psychosocial disciplines, ranging from medical and dental clinicians, through health professionals, to basic biomedical and clinical scientists.
