> 4 MILIOANE LOCUITORI

NU POT EFECTUA BRONHOSCOPIE

IN PROPRIUL JUDET

Lipsa aparaturii a fost mentionata de majoritatea medicilor interviewati

- si acolo unde nu exista servicii de bronhoscopie
- si acolo unde exista servicii de bronhologie numarul lor fiind considerat insuficient si nivelul nu destul de performant

Situatii care impiedica efectuarea cu succes a procedurilor bronhoscopice:

- L lipsa serviciilor de anatomie patologica si a laboratorelor de citologie(scade randamentul diagnostic)
- L lipsa serviciilor de ATI(evita procedurile cu risc de complicatii)
- L lipsa chirurgiei toracice(evita procedurile cu risc de complicatii)

Sugestii si dorinte:

- Crearea unui Program National de dotare cu aparatura pentru bronhoscopia diagnostica

- In Romania se poate trata optim in scop curativ neoplasmul bronhopulmonar ?

Chirurgia toracica

Centre si specialisti insuficienti

**SUPRASOLICITAREA FIZICA SI UZURA
INTELECTUALA A PERSONALULUI MEDICAL**

Chirurgia toracica

-Modul chirurgie toracica obligatoriu pentru studenti

-Dezvoltarea chirurgiei toracice in teritoriu

In fiecare judet !

Chirurgie toracica dotata cu aparatura si specialisti pentru chirurgia neoplasmului bronhopulmonar

ROMANIA

PROGRAM COERENT DE MANAGEMENT

PENTRU NEOPLASMUL BRONHOPULMONAR
